Training Instructor and Case Officer. The following points were reviewed:

Physical check of radio equipment
Signal plan and crystals checked
Danger/control signals
Cryptographic material assigned and discussed.
General discussion of new operating procedures.

b. The Commo Operations Officers found RNDOLLAR to be well-trained, capable and prepared for his mission.

5. Remarks

a. Having come in close contact with RNDOLLAR for 18 months, this writer believes any confidence placed in him is well warranted. He has never deviated from his eager desire to continue the kind of work he is doing. Although he is comparatively young and inclined to be lackadaisical when not actively engaged, he constantly maintained his sense of humor, alertness and general above average intelligence. He has already proved his courage and ability.

b. It is with complete confidence that we anticipate the activation of this new circuit and feel the time and effort to date will be amply justified.
